SeatGeek

Scope:

- Collect all events, performers, venues and seat offerings from SeatGeek in the United States.

- Collect tickets from all those events.

▼ Scraping Instructions

Iterate over all the cities and events from here: https://seatgeek.com/cities

This link only lists popular cities, so some events aren't covered there. It's not entirely clear how to get all performers, but unless you find a way, I suggest:

- Keep the same city-based crawling and create a master list of performers/hosts/teams/etc.

- Open each performer page and collect all events
